We still have a magnificent stock of Hemlocks, notwithstanding the fact that it is our largest selling evergreen. In addition to sizes listed, we have large specimens from 20 to 35 feet in height which are the admiration of all who see them.

Hemlocks can be used in many different ways: As lawn specimens they attain great size and beauty; by shearing they may be used in foundation planting and kept from overgrowing for years and years; for border or screen they form a most naturalistic background. Hemlocks thrive in shade or full sun and are practically immune to insects and diseases.

Rosedale evergreens must be seen to be appreciated. They are healthy, vigorous, well-shaped and grown in a river valley soil ideally suited for safe and easy transplanting. We invite your personal selection and believe we can assist you in a proper selection of varieties better here at the nursery than any other way.

A combination of evergreens and evergreen shrubs will produce an all year planting of unsurpassed beauty. The variety of color formation available in evergreens is not only extensive but almost unlimited.

One of our group plantings of Rhododendrons. Colorful when in bloom and green throughout the Winter.

Evergreen Shrubs

There is no class of plants which give more satisfaction than Broadleaved Evergreens, for they are beautiful at all seasons of the year. Not only does this class include the most gorgeous flowering plants, but the foliage of some in Winter is even more beautiful than in Summer. This is especially true of the *Leucothoe* and *Mahonia*, whose leaves take on the finest shades of red, from bronze to intense scarlet. We are especially well supplied with these native American plants in both large and small sizes.

FLORIBUNDAS—Always in Bloom

Recognized as one of the greatest achievements for the "Roses of Tomorrow," these Floribunda sensations present the qualifications for Rose success under even the most trying conditions. Added to extreme hardiness, they have unexcelled persistence of bloom; several varieties, like World's Fair, have Hybrid Tea size flowers in huge clusters from June until frost.

Plant Floribunda Roses in groups of 3, 12 or more, in beds, borders, or in groups among shrubs, perennials and evergreens. Their masses of color continuously through the Summer make a striking and permanent display. The flowers make excellent long lasting bouquets.
